

## rojo photography Portrait Pricing 2015/2016

### About rojo photography!

Brett Rojo is rojo photography, creating art for my clients that they will appreciate and enjoy for the rest of their life. With rojo photography, you will get fantastic, high quality portraits at competitive prices. I consider my photography "works of art" and my pricing is based on outstanding quality and the time and effort I put into each image. I have many options to choose from that will fit any budget.

### How does it work and what should I expect?

#### Consultation and Booking

We begin with a short visit at my studio so I can understand your wants and needs and help you understand my process from beginning to end. I can also answer any questions you may have about products, the session, or anything else you would like to discuss. We will determine the date and time of your session and accept your session payment to book and hold the date. If you can't make a consultation at my studio, I can certainly meet you at another location or conduct it over the phone.

#### Session

This is when the fun begins! All you have to do is be you. I will get you in the right light, the right pose, the right location to make your portraits amazing. My sessions are based on time, not poses, number of people, etc. It's whatever we can do during your session. If we haven't done so yet, we will also set the date and time for your presentation and order.

#### Presentation and Order

Within a week, we will be ready to view your images and place your order. I can make recommendations of products, help with the decision of an image, and answer any questions you have about my products but I will never pressure you on something you don't want. If you have other family members interested in ordering, please make them aware of your scheduled presentation date and time so they may order as well as this is a onetime presentation and ordering session. If this is not possible due to some were from out of town and you can't place their order for them, I can make arrangements with them for a separate presentation over the phone.

I utilize several prominent, professional photo labs which offer a variety of products. From thin canvas wraps to metallic prints to framed prints and just about anything else you can think of. If there is something you don't see here that you are interested in, let me know before our presentation and I will have quotes ready for you.
