More Information - All packages include the following:

Registry Service

Have our site listed in your registry and guests can go to our site and add funds to your account for you to purchase a la carte items.

90 Day Online Proofing and Gallery

You will be provided with your own private gallery and access code on our website. You can use this for your proofing and for saving your favorites for album design or packages and ordering. Your family and friends can use it to order prints so you can enjoy your new marriage without having to deal with fulfilling their print orders

Hi-Res Proof Images on cd/dvd

The Hi-Res Images are proof images/digital negatives. These are exposure and color corrected with a 2:3 crop applied. No manual creative/artistic enhancements or touchups are performed. This is only performed on images that are printed or used in albums design by rojo photography. You will receive a printed letter and a .pdf file on the disc which can be printed out that instructs the lab that you have permission and rights to reprint any image(s) up to 8x10 in size.

FAQ's

How many images will I receive on my cd/dvd?

You can expect roughly 75 images per hour of time I'm behind the camera. So a 6 hour package would be about 450 images.

Why don't you include hardcopy Proofs?

Proofs are general representations to make decisions about which images to print. Although the images still look good, they are not "final" prints. No creative/artistic enhancements or touchups are performed on these and they are only color and exposure corrected, then cropped. Proofs are used to determine what to include in your album or final prints. For years, photographers provided x number of 4x6 prints as proofs or a proof book with small thumbnail proof images. With today's technology, there are more efficient ways to deliver proofs so they save time and expense to both you and us.

How do I view my proofs?

All packages come with online proofing and ordering so they can be viewed online from any location. Since you will be receiving all the Hi-Res Images on a CD/DVD with print rights, you can view them on a computer or take them to your favorite photo lab and have them printed. You can print 4x6's cheaper than what I would charge if printed by one of our professional labs or if included in a package.

How long before my album is ready?

The post process of images and the design of the album is a time intensive process. There is also an approval stage where you view the album for the approval before sending off to the album maker. If any changes need to be made, that is additional time. Finally, it's off to the album maker for final creation and delivery back to me. This whole process can take anywhere from 4 to 8 weeks. I state 8 weeks in the contract but in most cases, it is sooner than that.
